

Dear FDA,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food, to ask that the agency's current policies be changed, and to support the points in docket # OOP-1211/CPI, specifically 2000

- All GE foods should be labeled so I am informed and have a choice!!!
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

Additional Personal Comments:

*What are you in the FDA thinking  
to let such an important thing as food be altered  
by this experiment with unknown consequences?*
